REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-9, the prior art fails to teach or suggest a method for assembling a forward link traffic multiplexing frame for transmission of a plurality of packets over a radio link, comprising "assembling the group of determined packet in a forward link traffic multiplexing frame; providing an identification of the group in the forward link traffic multiplexing frame; and providing an identification of a destined terminal for each of the determined packets in the group," which is considered in combination with other limitations, as specified in the independent claim 1.

Regarding claims 10-18, the prior art fails to teach or suggest a transmitter for transmission of a plurality of packets over a radio link, comprising "a multiplexer to assemble a forward link traffic multiplexing frame having a plurality of packets associated to a group, a group identification, and a sub-user identification for each of the plurality of packets in the group," which is considered in combination with other limitations, as specified in the independent claim 10.

Regarding claims 19–23, the prior art fails to teach or suggest a method for detecting a packet in a forward link traffic multiplexing frame that is destined to a terminal, comprising “determining that the forward link traffic multiplexing frame includes a group associated to the terminal by examining group identification information,” which is considered in combination with the other limitations, as specified in the independent claim 19.

Regarding claim 24, the prior art fails to teach or suggest a wireless access network for transmitting a plurality of packets over a radio link, comprising “assembling the group of determined packets in the forward link traffic multiplexing frame, providing an identification of the group in the forward link traffic multiplexing frame, and providing an identification of a destined terminal for each of the determined packets in the group,” which is considered in combination with the other limitations, as specified in the independent claim 24.

Regarding claims 25–30, the prior art fails to teach or suggest a terminal for receiving a forward link traffic multiplexing frame, comprising “means to examine a group identification information to determine that the forward link
